

1 **WHAT IS CLAIMED IS:**

2 1. A tool suspension plate for a screwdriver set comprising:

3 a base with a top, a bottom and two sides;

4 a resting flange formed on the bottom of the base and having multiple
5 through holes defined in the resting flange in different sizes to adapt to
6 respectively accommodate shafts of screwdrivers in the screwdriver set;

7 a positioning bracket (20) detachably mounted on the base (10) and
8 having an inner side abutting the base (10) and multiple positioning cutouts
9 (24) defined in the positioning bracket (20) in different sizes to extend to the
10 inner side to adapt to respectively accommodate handles of screwdrivers in the
11 screwdriver set; and

12 multiple stop plates (18) formed on the base near the top, each stop
13 plate (18) respectively aligning with one of the through holes (142) and
14 adapted to abut a top of the handle of a respective one of the screwdrivers.

15 2. The tool suspension plate for a screwdriver set as claimed in claim 1,
16 wherein the positioning bracket (20) has two ends and two locking sheets (22)
17 respectively formed on the two ends of the positioning bracket (20);

18 each locking sheet (22) has a hole (222) defined through the locking
19 sheet (22); and

20 two end brackets (16) are formed on the base (10) to engage
21 respectively with the locking sheets (22), wherein each end bracket (16) has a
22 locking hole (162) defined in the end bracket (16) to align with the hole (222)
23 in a corresponding one of the locking sheets (22) to engage with the locking
24 sheet (22) by means of a locking pin (164).

1 3. The tool suspension plate for a screwdriver set as claimed in claim 1,
2 wherein the positioning bracket (20) is a long strip with a middle portion and
3 has a strong post (26) with a channel (262);
4 a locking hole (15) is defined on the base (10) to align with the
5 channel (262); and
6 a long locking pin (152) extends through the channel (262) and the
7 locking hole (15).
8 4. The tool suspension plate for a screwdriver set as claimed in claim 2,
9 wherein the positioning bracket (20) is a long strip with a middle portion and
10 has a string post (26) with a channel (262);
11 a locking hole (15) is defined in the base (10) to align with the channel
12 (262); and
13 a long locking pin (152) extends through the channel (262) and the
14 locking hole (15).
15 5. The tool suspension plate for a screwdriver set as claimed in claim 4,
16 wherein the base (10) further has two suspension holes (12) defined near the
17 top of the base (10).
